

5 Key PSA Facts

1. Most **comprehensive, versatile, and automated** IEEE 802.3 PSE Conformance tester on the market.... by far.
 - *Virtual “Standard” used by PSE Silicon Vendors*
 - *Comprehensively test any IEEE 802.3 4-Pair or 2-Pair PSE*
2. **Only** integrated PSE tester that **fully eliminates** the need for all other test equipment in the validation of all PoE features.
 - *Including **PoE LLDP** Testing and Emulation for 802.3at & 802.3bt*
3. **Only** test product of any kind that supports fully automated **System Power Management** testing of 2-Pair PSE’s up to 192 ports.
4. **Only** scalable family of PoE test solutions with low entry points, flexible configurations, and **field upgrade capability** for features such as PSE Conformance Test Suites, PSE Multi-Port Suite, and LLDP Emulation and Analysis.
5. **Only** commercial test equipment available for PSE test, robustly documented and compliance tested (CSA, CE, FCC) to **50 Watt** Continuous Load per 2-pair port and **100 Watt** per 4-pair port.

Verification, Simplified.
